Vehicles (trucks) shown in this catalog have been designed with special specifications for the purpose of these photos. Specifications including cab color and various devices may differ in part from production models. Features and functions are explained in simple terms and therefore may differ from the specifications in your area. Dimensions and devices shown in this catalog may be changed without prior notice. Please contact your nearest dealer for details. Please note that load capacities may change should there be an increase in vehicle weight due to load area designs or special specifications. In handling the vehicle, please read the relevant instruction manual carefully and operate the vehicle properly. Colors shown in the photos may differ from the actual colors due to photographing and printing conditions.

Reliable, Valuable, Yours

Built for Durability and Usability

Inside and out, the New HINO300 Series is designed for enhancing quality. You'll notice it in the ease-of-use and in the versatility, the durability and the wide view from the cab. But most of all you'll notice it where it counts the most – your bottom line.

Optimized Cab Space

Intuitively designed, roomy and comfortable, the cab space is designed to give drivers what they need to perform at their best.

Wide cab model shown

CAB ACCESSIBILITY
The door openings and footsteps have been enlarged for easy entry and exit. In addition, the doors themselves are wider than before for easier entry and exit.

SEAT SLIDE
The seat rails are set on an incline to accommodate your seating position.

TILT & TELESCOPIC STEERING
The steering wheel is equipped with tilt-adjustment and telescoping functions.

LED METER PANEL (MT)
The meter cluster features highly visible readouts of necessary vehicle information.

FLAT SEAT
The new collapsible shift lever and parking brake lever both fold down, creating a flat surface between the driver's seat and passenger seat.

Power & Efficiency

Performance is maximized at every turn, making the HINO300 Series a trusted partner for business.

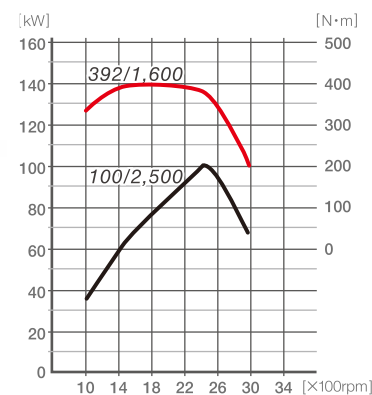

ENGINE

Building on their reputation of steady, dependable torque and unbeatable toughness, HINO's red engine has even further evolved for the new HINO300 Series, offering low emissions and enhanced fuel economy.

EURO 3

N04C-VA
Displacement: 4009cc
4-cylinder in-line
E/G output (kW/rpm) :
100kW/2,500rpm
E/G torque (N·m/rpm) :
392N·m/1,600rpm

TRANSMISSION

The automatic transmission enables effortless operation, while the manual transmission delivers ideal torque for smooth starts and acceleration.

AERODYNAMIC CAB

The windshield angle and the slanted cab design provide aerodynamic performance, enhancing fuel economy.

SUSPENSION

The leaf spring suspension offers high durability and flexibility for stability on rough roads.

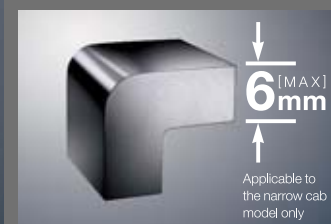

STABILIZER

The stabilizers have been lengthened and feature a link bracket, maintaining high effectiveness and stability.

CHASSIS

The chassis uses a box-frame for the front half and a channel-frame for the rear half.

FRAME

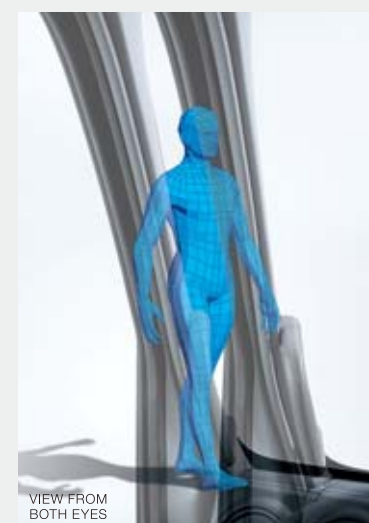

The HINO300's frame is both very strong and lightweight.

Advanced Active Safety

A number of advanced active safety features have been introduced.

The vehicles (trucks) shown are prototype models.

VIEW FROM BOTH EYES

WIDE-VIEW PILLAR*

The front pillars have been designed to give drivers good visibility and make pedestrians and cyclists easier to spot.

*Available for wide cab and crew cab models only

LEFT EYE VIEW

RIGHT EYE VIEW

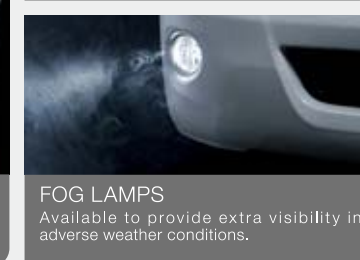

PILLAR-MOUNTED OUTER MIRRORS

Convex glass is combined to achieve a wider viewing angle.

HEAD LAMP

Halogen low-and-high-beams come standard-equipped. Wide Cab models feature enlarged headlamp housings for enhanced light distribution.

FOG LAMPS

Available to provide extra visibility in adverse weather conditions.

Reassuring Passive Safety

Passive safety features offer drivers a high level of confidence.

EGIS*1 CAB

The EGIS cab design is one of HINO's passive safety features, enhancing the rigidity of the cab.

[Photo] Vinçotte / ECE No.29 Cab of a commercial vehicle Front impact test*2

*1 : EGIS=Emergency Guard Impact Safety
*2 : Using a swing bob, this test subjects the cab to 44.1kJ of energy to verify the survival space (the area in front of the legs and around the head).

SRS* AIRBAG (DRIVER'S SIDE ONLY)

In the event of a forward collision, they deploy to help reduce the chance of injury when used together with seatbelts.

*SRS=Supplemental Restraint System

SIDE DOOR BEAM

Cabin rigidity is enhanced by the side beams inside the doors.

3-POINT SEATBELTS

In the event of a collision, the pretensioners tighten, helping reduce the possibility of injury.

Your Reliable Partner

Delivering Efficiency and Performance

Don't compromise on quality and functionality when you can have it all. Durable yet user-friendly, economical yet reliable, the HINO300 Series carries your business to new heights. It's time to take a closer look and see what HINO can do for you.

Expand Your Vision

Dependability to Power Your Business

Business success depends on two things: a solid base and the power to grow. The new HINO300 Series gives your fleet construction that delivers long-lasting dependability and an engine designed for high-power, high-efficiency performance. A hard-working light duty truck that's easy on your bottom line, the new HINO300 Series is built for new business opportunities.
